SECURITY &  
EMERGENCY  
MANAGEMENT  
INSTITUTE**

## MISSION: SAVE HUMAN LIVES

NIMSAT focuses on enriching public-private partnerships and advanced information technologies to enhance the national resiliency for a full range of potential disasters.

The goal is to build a more resilient America through education, training, outreach, and operational support to empower the homeland security and emergency management community.

Our mission is to get the business community back online after an emergency.

The LABEOC's efforts hope to improve State response, maximize self-sufficiency for businesses, and reduce reliance on federal assistance.

By gauging the situational awareness of local businesses, officials can make informed decisions and avoid duplication or conflict of efforts from different sectors.
